"Trade where the Trading's Good."

The quality of your ammunition is important—What we sell is guaranteed by the makers—and by ourselves.

We love guns and hunting, and we shoot what we sell—and sell what we shoot.

Our stock of shooting goods is checked up every morning, and during the next two months we expect to promptly and satisfactorily handle the surprisingly large shooting goods trade that is coming to this store.

Remember our prices and ranges.

Single barrel hammer guns from \$6.00 to \$11.00
Repeating shot guns from \$25.00 to \$32.50
Double barrel hammer guns from \$10.00 to \$25.00
Double barrel hammerless guns from \$18.00 to \$80.00

THE LADIES' COLLEGE TO OPEN JANUARY 7TH

Efficient Staff of Teachers Has Been Engaged

The date of the opening of Alberta Ladies' College has been set for January 7, 1913.

The roof story of the building has now been reached and soon the finishing will be well under way. The staff of teachers is nearly complete. They include: Mrs. Muldrew, formerly of Macdonald College, Montreal, lady principal. She will be assisted by Miss Frederica J. Campbell, as head of the household science department; Miss Helen L. Bowker, of Granby, Que., head of the department of music; and by Miss Marion F. Wilkie, of Toronto, in moderns, English and history.

The board feels that in the appointment of Mrs. Muldrew the success of the college is doubly assured. Her training, her culture, her high ideals, her executive ability and business instinct, and her long experience in Macdonald College, where she has made a place for herself in the affection and esteem of students, faculty and governors, all combine to give her a special fitness for the work before her here.

Miss Campbell is a native of Prince Edward Island, where she taught for a number of years, graduated this year with distinction from Macdonald College, Montreal, heading her class.

Miss Bowker is a graduate and medalist of the Royal College of Music and Royal Academy of Music of London, England, taking the highest number of marks ever taken by a Canadian student in the advanced grade. She studied under Prof. von Koenigsberg for over two years, and as a student of the piano in McGill conservatorium was chosen to play before Governor-General Earl Grey. She is also a concert performer of distinction.

Miss Wilkie is a graduate of Toronto University and gold medalist in Moderns in 1904. She is a professional specialist in French and German and has taught in Uxbridge high school and in Renfrew and Barnia Collegiate Institutes.

Appointments are pending in vocal music and in the commercial department.

The college building will be complete in all its appointments and the equipment first class. The college site comprises twenty-five acres of land, and for beauty and location is unsurpassed in the province.

The prospects are that the attendance of students will be large.

Serious Accident At Railway Yards

A serious accident happened to Mr. Campbell, engineer of the yard engine, on Monday evening. He and some others had been accustomed to taking a ride on the north-bound express, so as to reach their homes in the northern part of town more quickly, and then jumped off at the crossing. Generally he took the last car so there was no fear of being pulled under the train. But Monday night, apparently, he was not on the last car but near the middle. When he jumped his foot caught in the frog of the switch and he was thrown forward on his face, his head striking on a part of the ironwork. When he fell he probably threw out his right arm, and it went under the train and was severed below the elbow. His head was badly cut and injured and he lost much blood. Dr. Parsons was called at once, and Mr. Campbell was taken to the hospital, where he was doing as well as could be expected at last reports. There is not much fear that the injury will prove fatal.

A profitable investment—Red Deer West.

The town is busy today preparing for the reception to be given the Duke of Connaught, with the Duchess and Princess and party, to-morrow morning. The royal party will arrive from Edmonton some time during the early morning hours, and the car will remain in the yards until 9.15, when the reception begins. The details have been arranged and will be very simple.

The Duke will appear from his car at 9.15 in the morning, and will probably inspect his guard of honor, composed of members of Pine Lake Light Horse, under command of Capt. Sandeman. He will then be presented with an address of welcome by Mayor Welliver. The presenting of colors to two troops of Boy Scouts, under command of Scout Master Rev. C. W. G. Moore, will take place, and a reception will follow. His Royal Highness is desirous of meeting the people of Red Deer, and has issued a general invitation for all to be present. He and his party will leave for Calgary at 10 o'clock.

Every citizen having a flag should unfurl it wide to-morrow in honor of the first visit of royalty to our town. And the Town Council can assist very materially along this line by furnishing decorations for the buildings facing the park at the depot, where the reception will probably take place.

In no part of the west are there more loyal citizens than in Red Deer, some boasting of their loyalist ancestry.

It is not surprising, therefore, that the present visit will evoke the warmest expressions of loyalty and devotion from all classes in the community. As the representative of the King, no less than on his own account, do we feel honored by the visit of His Royal Highness. Since his arrival in Canada he has manifested the deepest interest in Canadian affairs, and has amply justified, as was expected, the appointment of a Royal Governor-General. Not less graciously and successfully have their Royal Highnesses the Duchess of Connaught and the Princess Patricia performed their duties.

When the Duke of Connaught, who has devoted a lifetime of loyal and fruitful service to the Empire, was appointed Governor-General of the Dominion, it was regarded as something more than an interesting event. It was felt by Canadians that his appointment was a recognition by the Imperial authorities of the growing greatness of the Dominion and of the large place which it must eventually hold in the common Empire. Ever since the days of Confederation it has been the aspiration of the people of Canada to have as their Governor-General a Prince of the Royal blood, and there was a warmth of feeling in their hearts for the son of Victoria the Good even before he reached our shores, and has since proven to be as democratic and popular a representative of the King as any one of his distinguished predecessors. Our most hopeful expectations have been fully realized, and the Duke of Connaught has shown his desire to get in closest touch with the ideals and aspirations of the subjects of the King in this portion of the wide realm. The present tour of the Dominion will give the Governor-General a fuller knowledge of the growth and development of the Dominion and a closer insight to the loyal feelings that inspire Canadians from the Atlantic to the Pacific to the service of the Crown.

Red Deer tender the love, affection and esteem of its citizens to the representatives of the King who will be with us to-morrow.

THE C. N. R. BUSY EXTENDING LINES

The C.N.R. say they will connect Red Deer with their steel this fall. A dispatch in Monday's paper said: Although the C.N.R. is establishing direct railway connection between Edmonton and Calgary by way of Camrose and the Vegreville-Calgary line, their projects include a line so direct as to enable them to compete on equal terms with the C. & E. section of the C.P.R. Ten miles of this line is graded from Edmonton south, and track will be laid to the White Star coal mines this winter.

Another section of this line has been graded between Lacombe and Red Deer using a portion of the C. N. Brazeau line for a part of the distance. The C. N. will have rail connection with both Lacombe and Red Deer over this grade this fall by way of their Brazeau line, which leaves the Vegreville-Calgary line at Warden, five miles from Stettler. The five miles spur is five miles and the Red Deer seven miles long. These will form part of the Edmonton-Calgary direct line.

BRAZEAU LINE.

The Brazeau line leaves the Vegreville-Calgary line at Warden, five miles south of Stettler. Track is laid for 112 miles to the crossing of the Saskatchewan river at the site of the old H. B. post known as Rocky Mountain House. The C.P.R. is building a parallel line and is constructing a bridge across the Saskatchewan about the same point. Negotiations are in progress between the two companies with a view to both using the one bridge. Owing to these negotiations very little is done for eight miles at the proposed crossing, but beyond that point 47 miles are under active construction and will be finished this winter. A nine-mile spur will take the track to the collieries, which are the present objective, and it is expected that the rails will reach the mines by next June. A survey has been made which carries this line northwesterly from a point near the collieries to a point on the main line near the entrance to the Jasper pass. But there is present intention of constructing beyond the collieries.

Baseball Finals

Games in Red Deer next week.

On Monday and Tuesday Red Deer and Calgary play the first two games of the best of seven series. The games will be played probably at five or five-thirty in the afternoon, so as to give plenty of time before dark and still not interfere too much with the day's work. There are sure to be good games and everybody should turn out. Remember the more encouragement the team gets the more apt they are to win. The team will probably have a stronger outfield than they have had most of the season, and an infield is also expected to be in good shape.

DEERS AND BRONCHOS BREAK EVEN IN BATTLE.

Red Deer and Calgary played a doubleheader at Calgary on Monday. Calgary had Phil Leslie back in the game on the pitcher's mound, and he was easy meat for the Deers. He secured 12 hits off him, which brought in 12 runs, which total was one run better than the Calgary bunch could show with fifteen substitutes off Dickenson. Score by innings—Red Deer 002003100—12
Calgary 00000000—11

Manning pitched the evening game, and though the Deers were beaten, they are showing more of their old fighting spirit again and will give a good account of themselves. It was only a five inning affair and Calgary got away right at the start with 2 runs. Barons was almost unsolvable to the Deers, as Mills was the only man who got a hit. The score by innings—Red Deer 10001—2
Calgary 2021x—5

Ladies' Fibre Matting case, all edges bound, inside straps, brass lock and side catches, at \$3.50.

THE W.E. LORD CO., LTD

A Simple Question

(From the Chicago Journal)
The subsidy hunters are trying to beg the issue of tolls on the Panama canal.
It is worth while to get down to the real issue.
By the Hay-Pauncefote treaty with England, we pledged our word of honor to treat all nations alike. We promised to keep the canal open to the ships of all nations on terms of absolute equality.
Do we mean to keep our word, or to break it? All the roaring of all the jingoes and subsidy-seekers can not obscure this basic question.
Shall we break our solemn pledge for the sake of conferring some easy grant on the owners of the shipping trust?

Frank Now Moving Beyond Danger Zone

Slide Last Month Caused the People to Recognize Previous Government Warnings.

Ottawa, Aug. 30.—The town of Frank, Alta., which is at the base of Turtle Mountain, and which was practically wiped out by a landslide in 1903, causing the death of 20 people, has had another scare. As a result, according to word received at Ottawa, the town is preparing to move to a new site some two miles away. The citizens of Frank have had many warnings of danger. It was a provincial matter, the Dominion government could not do more than point out the danger.

However, in the latter part of July the mountain sent down another slide, tearing up trees and throwing down boulders, which caused considerable damage. The slide on this occasion confined itself to the course of the old slide and did no damage beyond smashing a few buildings. The town council is at last heeding the word and has been received that the whole town is now preparing to move to a new site which has been selected, two miles away.

Halifax Sees Man Start on Trip to West Coast by Auto

Halifax, N.S., August 28.—At three o'clock yesterday afternoon Mr. Thomas W. Wilby started from this city on an automobile trip which he plans to end on the western coast of Vancouver Island about six weeks hence, thereby demonstrating the practicability of the Canadian highway. He is the official representative of the Canadian Highway Association, and flies the pennant of that organization on his touring car. This, and the flag of the Automobile Club of Canada, are the only decorations which he sports.

For several months preparation have been going on for this first cross-Canada journey. Co-operating with the energetic pathfinder, the officers of the Canadian Highway Association have prepared maps, plans, charts, etc., which will be invaluable to Mr. Wilby. A chain of pilots has also been provided across the continent. Those in Eastern Canada, as far as the Great Lakes, have been selected by different automobile clubs in that section. At the same time, the men have been appointed by the Canadian Highway Association. In most cases the pilot is a local resident, and it is his intention to accompany Mr. Wilby for at least one hundred miles on his journey, rendering him services as guide when the district served by another officer is reached. There are, of course, great difficulties to be met with on the journey. For many weeks it seemed as if the trip would have to be abandoned, as there seemed no possibility of getting beyond the Great Lakes, short of shipping the car over the railroad or on one of the boats plying on the inland sea, but a few days ago Mr. Wilby was informed that a party which had been sent out to thoroughly investigate conditions in that locality, had reported that a route which appeared to be passable had at length been located.

Before leaving Halifax for his western destination, Mr. Wilby was presented with a number of letters to be delivered en route, these being from acting Mayor Martin to representative western men. One of these letters is to His Royal Highness the Duke of Connaught, patron, and another to W. J. Kerr, President, of the Canadian Highway Association.

Valuable assistance is being given by Victor Parker, editor of the Modern Power Magazine, of Winnipeg, who has volunteered to pilot Mr. Wilby for 100 miles outside of Winnipeg. Mayor Fleming, of Brandon, has arranged for a pilot, for his town, for a considerable distance westward, where he will relinquish his task to the Regina pilot. Members of the Medicine Hat Automobile Club are to take charge of Mr. Wilby in Alberta and convey him to the British Columbia boundary, where he will be met by Mr. John Lowenberg, who will have charge of him as far as Castlegar, where Mr. John D. Anderson, another vice-president, will undertake to pilot the car as far as Grand Forks, from which point Mr. Wilby will have the assistance of Mr. Jeff Davis. At Prince Rupert an expeditionary party is waiting with horses, which it is expected will be necessary in crossing the two divides on the Hope mountains. This part of the trip, it is believed, will be the most difficult of the whole undertaking, and in the event of Mr. Wilby negotiating this obstacle, he will be met at the town of Hope by President W. J. Kerr.

who will escort him to Chilliwack and across the Fraser Valley to Westminster and Vancouver, stopping at Westminster long enough to entertain the pathfinder at a luncheon to be given in his honor.

From Nanaimo to the western coast of Vancouver Island no great difficulty is to be encountered, the roads as far as Sprout Lake being in excellent condition. At this point may be made to reach the coast at Long Beach, but if this is not feasible, the journey will come to an official end at Strathcona Park.

FACTORY AND FARM

Together They Build up the Ideal Home Market

No better example of the interdependence of the manufacturing and agricultural interests is required than Ontario. It is not necessary to go into the enormous industrial expansion in the province in the last two years. This is everywhere evident. But what of the farm? The field crop of Ontario last year was valued at \$250,000,000 or an average of 15¢ per bushel. The value of the province's agricultural output was placed at 14¢ millions, and ten years ago it was more than a hundred millions. The number of farms to share in this one hundred millions was larger then than now, so that the average income of each farm was considerably less than \$1,666. In fact, the average income in 1901 was about \$600, according to the figures made from statistics published by the Department of Agriculture. This means that the Ontario farm of to-day is giving its owner, returns that are at least 160 per cent. greater than they were in 1901. The growing value of the output of the farms can only result in one thing and that is the increased value of the land. Thus, the latest records of the assessment of the rural areas show that the farm lands of Ontario are worth over \$108,000,000 more than in the first years of the last decade. To make the comparison still more striking, the assessed rural land of Ontario is worth \$10 an acre more than in 1901, and another significant fact is that the area of these lands has expanded in the last ten years fully 1,500,000 acres, showing that farming is actually becoming a more widely followed pursuit in Ontario.

What is true of Ontario also applies to Manitoba, Saskatchewan, Alberta and other provinces. The greatest prosperity is where a fertile farming district is tributary to a good factory town. The one helps the other. The best market for the local farmer is the home market, and the best prospect for the citizen is from the near-by farms and gardens.

RAISING LIVE STOCK

Grain Growing Alone Is Not Adequate in Southern Manitoba

It takes time to change from growing grain to raising livestock and dairy cattle. But southern Manitoba is being both induced and forced into the change. The crops in the last three years have been so good that they are used to be, and the demand for all kinds of small food products from markets like Winnipeg and from the new settlers in Saskatchewan and Alberta has been so great as to prove the profitability of feeding grain and fodder instead of growing grain alone. The result is that many a station platform is decorated with tin-lunged milk cans these days, waiting to be loaded by city dairies or to be consumed by a local creamery or cheese factory. Last year the district between Winnipeg and Morden, which is merely the central portion of Manitoba, marketed 6,472 head of cattle, 2,790 horses, and 10,338 hogs, an increase of nearly twenty per cent. in every department over the previous year. In dairy products he Manitoba raised last year some \$60,000 more than in 1910, and realized over \$200,000 more for his cattle. Creameries produced and sold nearly 400,000 pounds more butter than in 1910, and marketed 1,412 head of cattle for the two years for dairy products, over \$1,636,000 was received in 1911, as against \$1,372,000 in the previous year. This season will see further increases in these items.

Stand by your guns, Colonel. Every man knows in his heart that the Colonel is right.

OUR PULPWOOD

Sufficient Cut Yearly to Keep One Hundred and Twenty Mills Going

Fifty-six per cent. of the pulpwood cut in Canada during the year 1911 was exported to the United States. This is the fact shown by statistics collected by the Forestry Branch of the Department of the Interior. The total quantity of pulpwood cut in Canada during 1911 was 1,650,227 cords. The quantity exported amounted to 847,539 cords, while the remaining forty-four per cent. (622,288 cords) was manufactured in Canada. The value of this pulpwood was \$5,340,592 (an average of \$5.29 per cord). Had the wood been retained in Canada and manufactured here, it is estimated that the value would have been increased to about \$15,000,000.

Had Canada manufactured its wood-pulp all the pulpwood she produced, she could have had enough to supply a hundred and twenty-two mills of the average size of those operating in Canada, instead of the fifty-four she now has. Quebec could have supplied sixty per cent. more mills than she is now doing, and New Brunswick could have doubled the number of her mills.

BOYS WHO ARE NEEDED.
The qualities that make a boy so indispensable to all departments of modern life are not hard to distinguish or define. They are evident on the front of all the boy's activity—his frankness and honesty, his versatility, his abundant vitality and endurance, his teachableness, his obligingness, his good spirits, his readiness and enthusiasm for subordinating his own desires to the characteristic qualities, the right kind of boy is a treasure to any employer.—Selected.

SOMETHING FOR BOYS.

A few weeks ago I saw a touching and beautiful sight. Driving through a rough part of the country, my attention was directed to an elderly woman trying to pick her way over a rough hillside. I heard a whistling boy coming up behind my carriage. He bounded up, and running up the hill, put his arm around the woman and steadied her steps, saying pleasant words, I know, for the face looked happy for the remarks. As I passed, I heard her say these words: "It is so nice to have a boy to come and help a mother down the hill!" They passed on and went into a farmhouse. I knew they were mother and son.

A HEAVENLY VISION.

My heart was sad and discouraged. And lonely, and sick, and sore. As I thought of the sorrows of millions. And pondered them o'er and o'er: Of the sigh of tired women; Of the groan of discouraged men; Of the cry of the broken-hearted. That sounded again and again; Of the wail of weeping children. The strife that would never cease. And I longed for Christ's coming to the Kingdom. For the reign of the Prince of Peace.

Then a voice came through the twilight.

Like the voice of a silver bell. And it spoke to my heart of sadness. And this message to me did tell: Fear not and be not discouraged; To labor and win is thy part; Fear not and be not discouraged. And I will strengthen thee heart. Then a light broke on my vision; The mist fell from my eyes. And I saw a heavenly being in splendor before me. And he bade me to lift the fallen; To cheer and strengthen the weak; To comfort and encourage the broken-hearted. And help him above to seek. He showed me a narrow pathway That was bordered with love untold. And he pointed a heavenly city Where mansions built of gold. A voice that was firm and clear— And it healed my drooping spirit. With this message of love and cheer: Fear not and be not discouraged; To labor and win is thy part; Fear not and be not discouraged. And I will strengthen thee heart.

NO LIQUOR IN THE CAMPS.

(Winnipeg Tribune)
Whiskey has its place as a medicine, but as a beverage it has no place in the military camps of Canada, where our young lads assemble for military training, and more important still, physical exercise that will better fit them to discharge the ordinary and important duties of life. And what is said of whiskey applies to all intoxicants. If the old timers would have their grog, let them find it outside the military camps. This, in effect, is the position taken by Col. Sam Hughes, Minister of Militia, and he is right. Public opinion is behind him. The officer who cannot overcome his "thirst" for a few brief days in camp had better resign. Any man who has been connected with the militia knows of the temptations. Whiskey has been one of its curses, and hundreds of young men have been started on their downward path by the bad example of officers and older heads who should have known better.

Stand by your guns, Colonel. Every man knows in his heart that the Colonel is right.

WALKING ON WATER.

One night, while in a meeting, Dr. Torrey received a note from the question box to this effect: "If you are as great as you pretend to be, walk on water." And answered the note was, "Now don't you dodge this." Dr. Torrey read the question, "Can you walk on water?" and replied, "Yes, my friend, a great deal better than I can on whiskey."—Selected.

MADE HIS FATHER GIVE.

NEW YORK, July 18.—"Have a cigar," said John C. Spooner, formerly United States Senator from Wisconsin, to his visitor as he pushed a box of perfect cigars toward him. The Senator sat in his den looking out upon Central Park, with the floor strewn with law books, which he had been using as a footstool upon an international tariff question. Declining the proffered cigar with the remark that he did not smoke, he turned to his visitor to hear the Senator say: "Neither do I, and the way in which I came to stop smoking is a queer story." Then he told him he gave up the "narcotic habit."

"For thirty years I was an incessant smoker," said the Senator, "and had a cigar in my mouth nearly all the time. Cigars soothed my

nerves when I worked hard. At least that was my belief. I knew the habit was filling me with nicotine, but it did not seem to affect my health much.

SOME PATERNAL ADVICE.

My son Charles had been graduated from a law school and was preparing to go west and put out his shingle in a new country. He and I conversed one night before the time of his departure, and as we conversed I thought that before he left it would be a good idea to have the boy quit drinking. At the time I did not really know whether he was addicted to the habit or not, but I thought that as he was going away, it would be a good idea to have him promise not to drink. "Do you drink, Charlie?" I said to him, and he responded, "Once in a while, Pa!"

RIGHT BACK AT HIM.

"Coolly looking me over, Charlie said, 'Father, you smoke too much. I am going to fill me with nicotine. I am going away and I will probably not see each other for some time. This would not be much of each other again for a good many years, and it would give me great consolation to know that wherever you are you are no danger of being ruined by drink.'"

POPE SINKING FAST, SAYS French Paper

Paris, Aug. 29.—Religious papers have not told all the truth, according to the Paris Matin. It takes great delight in smoking a good cigar, but if you are game so am I. We will both quit our bad habits. I have a great deal of hard work to do between now and the time the Senate adjourns for the session, and I think I can do it better if I have a cigar in my mouth. But when the Speaker's gavel sounds for the last time I will throw away my cigar and will never smoke again. The Senator said he and his son shook hands on the compact and that both of them have kept their pledge.

Honor the Pioneer Women

(Calgary Albertan)
Usually, in thinking of the pioneer days of the West, one thinks of the men, the ones who rode and tramped and fought through the open land against weather, conditions, and sometimes other men. Speaking of old-timers, one seldom thinks of the women, the latent helpmates who came cheerfully to the lone homestead, and who, for the first years in some lonely shack, miles and miles from neighbors, seeing few except their own immediate families. It was these women who, by their endurance made it possible for the men to remain and carry to success the undertakings they had commenced. No one thinks of these brave women who smiled through sickness, cold, loneliness, sorrow and poverty; few remember the great deeds they did in silence.

They bound up the wounded, loved, tenderly cared for the unfortunate who had suffered from privation and exposure, made welcome every stranger and traveller, and were the binding tie which kept the men steadily to the aim of a future. All honor to the women of the West, the women who came with their families, driving thousands of miles across country ahead of the railroad, living contentedly in a mud-roofed shack in order to be near their loved ones. Song and story is written full of the deeds of the old-time Western men, yet the women were perhaps the braver. Tender, unimpaired to hardships, they came and stayed bravely by the life which they were to live, and they were harder than it was to the men.

In the pageant of The Stampede a place of honor has been assigned to the old-time heroines, who first came to Alberta. Mrs. J. A. Lougheed, prominent among the women settlers in the west, accompanied by thirty other ladies who have seen Alberta grow from a wide, featureless plain to a thriving land of happy towns and happy homes, broken by rich fields, are to take part. They will ride in one of the old stage-coaches in the pageant, and will present one of the most pleasing phases of the great spectacle. They exemplify the women of the early days, the mothers of the West, and have much honor cannot be given them. Following toward the end of the parade, will be a great float drawn by six huge prize-winning Percheron horses from a famous stock ranch. On this float will be a score of girl graduates of the Western institutions of learning, they too presenting an interesting section of the pageant and the conditions of the present. The women of old, and the girls of today, both will be seen, and both are worthy of fullest appreciation.

TO OUR PATRONS

Last week we announced that our Mr. R. C. McLean had left for the east to purchase goods. Since coming to Red Deer our ever increasing business has compelled us to study ways and means to come in touch with our numerous customers, and to work in their interests as well as our own. Therefore we have been compelled, to a certain extent, to make our purchases through travellers, but we have concluded that as much as possible we will do away with the middle man's profit and give our customers the benefit in this connection.

Mr. McLean will visit all the leading cities of the east and make such purchases as will be necessary for the growing requirements of Red Deer, and at the very lowest possible prices, and our customers will reap the benefit, in better goods at lower prices than ever before.

SPECIALS IN OUR DRY GOODS DEPARTMENT

Wash Materials

MAKE OUR OWN BINDER TWINE

An Industry That Should be Encouraged in Western Canada—Use the Raw Flax Fibre

The farmers of Western Canada are now busy harvesting a crop which it is estimated will yield two hundred and fifty million bushels. Think for a moment of the enormous quantity of binder twine that will be sold! Yet with the existence of such a market comparatively little of the twine is made here. Our needs are really supplied by the United States. Tons and tons of flax fibre, which some day will be perfected as a raw material for the manufacture of binder twine, are going to waste on the prairies every season, all because no one can make profitable use of it in Canada. There is not even the inducement to save this raw material for the purpose of manufacturing. Such a condition exists chiefly of an unequal competition in the binder twine trade between Canada and the United States. Older and more powerful industries have not only absolutely free access to the Canadian market, but also practically monopolize the valuable supplies of raw materials in the Philippine Islands. Time was, when the greater part of the binder twine business of Canada was carried on by Canadian manufacturers. To-day, an overwhelmingly large share of this business is in the hands of the so-called Harvest Trust, which does not make a pound of twine in Canada, but sends it from mills located across the line.

STOCK AND THE DAIRY

Development of These Industries Along the Calgary-Edmonton Line

Possible: a part of the West offers better facilities for mixed farming than that along the railway from Macleod north to Edmonton. There is little or no dairying, however, until one strikes Nanton, where there is a new creamery which is producing 1,000 lbs. of butter a week, having increased from 500 lbs. in three weeks. The people all through this territory are devoting more and more attention to dairying, stock raising, and the growing of coarse grains. They are also keen along the line of industrial development. The trip from High River to Edmonton reminds one of a person of Old England. The rolling land, dairy herds, horses, streams, patches of bush are attractive and offer exceptional opportunities for mixed farming. This applies especially to the district between Calgary and Edmonton. In some cases the early frost of last year which caught the wheat was a blessing in disguise and compelled some farmers to look to other avenues of industry that they might not see. Necessary financial returns, at Langdon one farmer fed his frozen wheat to hogs, and in that way obtained \$1 a bushel for it. E. B. Wellshelmer who farms 160 acres has gone into stock raising, sells no grain but feeds it to his hogs, thus obtaining good returns from his farm. Further evidence of mixed farming is seen in the large number of cans of milk and cream at various stations. Carleton Place sends a large quantity of milk to Calgary at \$2.25 per hundred lbs. in winter and \$1.50 per hundred lbs. in summer. One farmer has stables for 114 head of dairy cattle, having a barn and equipment costing \$8,000.00. Two other farms have 60 dairy cattle each. Didsbury ships large quantities of milk, butter, cream and eggs, and three cars of hogs per week. As many as 200 cans of dry milk and cream are sent to Calgary. A large quantity of hay is shipped from Didsbury, Oida, Innisfail, and adjacent points to British Columbia.

LOCAL MARKETS HELP FARMERS

Extension of Industries Provides a Market for Produce

A despatch to the Toronto Globe from St. John, N.B., says: "An encouraging feature of the outlook for farmers in the Maritime Provinces is the growth of the towns, which provide a growing market for produce. While there is no phenomenal growth, it is steady. Take for example, the town of Amherst. The Board of Trade met last week to discuss the housing problem. It was stated that from 100 to 150 men were working in Amherst factories lived elsewhere, because of a lack of houses in the town, and President Curry of the board stated that the population of Amherst would be increased by 1,000 this summer if houses could be provided. The increase would be almost wholly due to enlargement of the number of industries requiring skilled workmen. In Sydney a new mill is nearing completion, which will give employment to about 200 hands, and other industries in that town are also growing. Other towns in Nova Scotia are showing substantial growth, and this all means a better local market for the farmer."

New C.P.R. Vessel Safest Craft Afloat

Empress of Russia Unsinkable Declares Builder of Ship at Launching.

London, Aug. 29.—At the launching of the Canadian Pacific steamer the Empress of Russia yesterday, the

chairman of the building company said that the question of safety at sea had been much before the public of late. This new vessel is so constructed that in the event of anything unforeseen occurring she would float with any of her four compartments flooded, instead of two compartments, which had been the case of the standard of safety hitherto, and as far as he was aware, this was the first merchant ship launched in this condition.

MUST KEEP OUR RAW MATERIAL

Pulpwood Exports are Instance of Enormous Loss That Has Accrued to Canadian Industry

The Department of the Interior, Ottawa, has issued a report on "Pulpwood" in part as follows: "If the pulpwood exported in 1911 had been reduced to pulp in Canada it would have supplied 68 mills of the average size of those in Canada. Thus one hundred and twenty mills instead of fifty-four would have been operating in Canada, employing Canadian labor and advancing Canadian industry. The provincial laws affecting the export of pulpwood in the exporting provinces have changed considerably in 1911. In 1909, pulpwood from private lands in Ontario and from all lands in Quebec and New Brunswick could be shipped to points outside of Canada. In that year, however, the province of Quebec, under the restrictive regulations which came into force on the 1st of September, 1910, prohibiting the export of unmanufactured wood cut on Crown lands within the province; and in 1911 New Brunswick passed legislation to the same effect, coming into force on the first day of October of that year, too late to affect the 1911 export trade.

Legislation Needed
"The effect of the Quebec legislation is noticeable this year. The export of raw pulpwood from the province was decreased by 112,544 cords, or 18.3 per cent. Its domestic consumption increased by 47,671 cords, or nearly 14 per cent, and three new mills were started in addition to several others under construction in the other provinces taken together, the export of raw pulpwood increased by 47,692 cords, or 29 per cent; the domestic consumption was increased by 26,120 cords, or 10.2 per cent, and the mill loss reported. It is evident that this legislation is already having the desired effect in stimulating the growth of the industry. It would also seem to have been effective in stimulating the export of pulpwood from other provinces, and from private lands in the province of Quebec.

"All the provinces are fully alive to the importance of preventing the export of this valuable raw material. So far as it is in their power, they have taken steps to prevent it from being carried off to build up the industries of another country, yet more than half the pulpwood cut in Canada is still carried over the border to supply the pulp mills of the United States. Nearly all of this wood is cut from privately owned land, over which the provinces have no jurisdiction. Only the federal authority, by the imposition of a prohibitive export tax, could stop this export.

Loss to Canada
It is interesting to note to what extent provincial industry would have been increased if the pulpwood exported to the United States had been converted into wood-pulp on Canadian soil. The 626,136 cords exported from Quebec would have supplied material for a year to forty-five pulp-mills of the average size operating in Quebec. In Ontario, six mills of the average size could have been kept running with the pulp logs exported from that province. The 122,698 cords shipped from the ports of New Brunswick would have supplied ten mills of the average size. If the high production of 1909 be taken as the normal capacity of the mills of the province. More than twice the number of mills operating in the Dominion might now be at work if Canadians had been far-sighted enough to manufacture their own raw products.

THE DAIRY INDUSTRY
J. W. Mitchell, of Manitoba Agriculture College refers to the dairy branch of farm work as a manufacturing industry, declaring the full financial returns were to be obtained from it the work must be done on business principles. Good cows must be obtained, for a poor dairy cow was an unprofitable investment. A good dairy cow would yield about 6,000 pounds of milk in a year, after testing the yield of over 225 herds throughout Manitoba. However, Prof. Mitchell declared that the average was only 2,000 lbs. It was much more profitable to have only 6 cows to keep and care for than 12 poor ones, and 6 good cows would yield as much as 12 poor ones.

Accidental Death
At the Hackney Coroner's Court, Dr. Guthrie informed a doctor, who gave evidence, that if a person is at the point of death, and receives a blow which accelerates death by two minutes, that is in law an accidental death.

Widen Their Jaws
Fifty New York schoolchildren are, says the "Express," to have their jaws widened to improve their mental development. The doctor who recommended the treatment contends that a small lower jaw means small brain capacity.

Ohio Village is Destroyed By a Raging Storm

Town of Lebanon Many Feet Under Water—Loss Enormous

Dayton, Aug. 28.—Cloudburst and lightning practically wiped out the village of Lebanon, Ohio, county seat of Warren county, at ten o'clock to-night. Communication by telephone and telegraph has been destroyed, but riders have relayed the story of the disaster to nearby villages. So far no lives have been reported lost, but the property damage will run into thousands of dollars.

Whole blocks are under water. Nearly every house and business block in the city is submerged to the upper stories. Boatmen succeeded in rescuing a number of persons when the torrents descended.

The body of Mrs. Zep Enfield, lying in the casket in the front room of the Enfield residence in the west end of the city, was washed out of the house when the walls were waded away. One in the street, the casket sank. Divers and searchers with grappling hooks have been unable to recover the body.

Two fires in residences were started by lightning during the worst of the deluge. They were left to burn out in the torrent of rain as the village fire brigade were unable to reach the scene of the fires. The damage to crops in the surrounding country will be very great.

CRAZY WOMAN WANTS FOR TAP WITH KNIVES, SAYS SHE'S WIFE.
Columbus, Ohio, Aug. 29.—Caroline Heers, aged 40, who said she was from Greenville, Ohio, was arrested by Pittsburgh detectives at the Southern hotel, while waiting for President Taft with two long knives found concealed in her clothing.

The woman said she was the wife of the president. Mrs. Heers said she was going to shoot the president, and had been noticed yesterday afternoon waiting around the hotel, and told employees that she was waiting for the president.

"I have the sacred knife for President Taft," she told a detective when arrested. The woman did not get near the president's quarters, and was rushed out of the hotel as the president's party arrived. She was found in one of the upper floors waiting near the elevator on which it was expected the president would go to his apartments.

One of the knives found in her clothing was a long razor blade affair, on the handle of which a picture of President Taft had been photographed.

Mrs. Heers was well clad. A roll of \$200 was found in her clothing.

NEW CLASSIFIED ADVERTISEMENTS

FOR SALE.
About one-half acre of growing potatoes and turnips, half mile from post office. Apply to P.O. Box 121, or to News Office.
Red Deer, Aug. 27, 2w1.

THE ...
Gaetz-Cornett Drug & Book COMPANY

LOCAL AND GENERAL

Building continues in Red Deer West.

W. P. Landon is visiting his daughters at Saskatoon.

Mrs. J. M. Manning, of Calgary, is visiting with Mrs. S. N. Carscadden.

Investigate Red Deer West and then invest.

J. Foster and Henry Johnson, of Wolverhampton, England, are the guests of W. H. Hadley.

Mrs. F. S. Simpson returned Tuesday last from a three-months' visit to her parents at the Coast.

Mr. and Mrs. A. Morley and son, of Fleming, Sask., have been visiting Mr. and Mrs. W. J. Botterill the past week.

The rainfall from April to August has been 22.24 inches, which exceeds the average precipitation for the whole year.

Mr. and Mrs. Sage passed through on their way to Calgary on Monday, and were met by many old friends at the train.

Miss Michener will re-open her music class, Monday, September 16. Pupils will come for the lessons at the usual hour.

There have been many rugby enthusiasts practicing at the school grounds recently. Much interest would probably be shown if they were to get up a game or two.

A meeting of the Board of Trade will be held on Tuesday evening of next week, September 10th, in the Oddfellows' Hall, at 8.15 p.m., when all members are requested to make a strong effort to attend.

C. Bremner, Wallace Dorrance, J. Arthur Carswell and Desmond George have passed their senior matriculation examination, and Ralph Smith has passed his science matriculation examination for Alberta University.

Mrs. Eliza Scarf, wife of Frederick Scarf, of Bowden, died at the hospital, Monday, August 26th, after an operation for obstruction of the bowels. She was 74 years of age, and there were slight hopes from the first. Clare Stone took the remains to Bowden last week.

Postmaster H. Wallace is moving the post office today to the south side of the News building, where the post office will likely be located until the new post office building is completed. The Gaetz-Cornett Drug & Book Co. will occupy the premises vacated by the post office, as their growing business necessitates the firm securing more room for their needs.

The Commissioner is in touch with a couple of men regarding the locating of a flax mill at Red Deer. It is hard to get information regarding the growing of flax and handling of it in this particular district. Any who has grown flax here, and can give any information regarding it, will confer a favor by calling at the Board of Trade office.

A number of the harvesters who have been coming out on special excursions have come through to Red Deer. This district has been fortunate in securing a number of men from some of the best districts in Ontario—young fellows who have been raised on farms, who come from good homes, and are decided acquisitions to the community. A number of them intend to remain in the west and buy or take up land.

The financial meeting of Red Deer district met in Red Deer Methodist Church on Tuesday morning. It was to estimate the approximate expenditure of each field. The increase towards ministerial support for the district is to be \$241. Delburne circuit has contracted to supply its own minister. Penhold and Inisfail have both advanced. Bowden, by a plan of co-operation with the Presbyterian Church, promises self-support to a minister appointed by the co-operative committee.

The Bassano and Red Deer baseballers enjoyed some duck shooting last week, and from all accounts the ducks probably enjoyed the fun, too, though the noise rather disturbed their rest. Outside of the noise, however, they were quite undisturbed if they only remained quiet and did not fly into harm's way. Several mudhens were slaughtered and proudly displayed, and the sportsmen proclaimed that they were not boppers because they had all been shot on the wing.

A number of land seekers from North Dakota have been in town during the last week. Mr. E. A. Hall, of Devilsburg, is taking a trip through the west with the idea of locating here. He is the owner of two newspapers in Dakota, but puts his main attention on farming. He said, "I always look over the town, and if the town looks good I know there is a good country behind it. Where the country is good there will be sure to be good towns. This seems to be a great grass country, and I know I could make money in stock raising."

The following hospital donations for the month of August were received: Mrs. W. A. Moore, flowers and magazines; Marjory and Grace Allen, flowers; Mr. H. C. Besant, vegetables; Mr. F. Mott, 2 feeding cups; Mrs. Cole, flowers; Lady Irene Campbell, magazines; Mrs. Stent, flowers; Mr. Thompson, magazines; Industrial School, lettuce and flowers; Balmoral Ladies' Aid—2 dozen cups and saucers, dozen sauce dishes, dozen soup bowls, 2 dozen bread and butter plates, dozen larger plates, pitcher and slop bowl, dozen small pitchers, Ladies' Hospital Aid—2 square pans, dozen patty pans, 2 dish mops, pint measure, kitchen knife, 2 strainers, 4 bread tins, dozen knives, soap shaker, 2 clean jars, butter, clock, 8 sheets, Alexandra Club—\$5.00.

Everybody—or nearly so—likes Red Deer West.

Vince McConnell was down from Edmonton over Labor Day.

Mr. Munro was out of bed yesterday for the first time in a week. He has been suffering from an attack of pleurisy.

W. R. Davis is almost frightened to leave his shop for fear someone will get after him to have him a job with his new welding machine.

Work on the cement sidewalks is not progressing as fast as it might be on account of the rain, but the cement bridge on Gaetz Ave. is going ahead.

Mr. Claude Francis Stent and Miss Stent left Wednesday for Toronto, C. P. Stent to return to Trinity College, Miss Stent will be in residence at St. Margaret's College to finish her studies.

We have decided that we are having too much rain, and it must stop, as things are getting serious with late farmers, as he is getting behind in his crop operations and the field will be getting soggy.

Judge and Mrs. Lees returned from their trip to the east Sunday last. The Judge says grain cutting is well under way all along the line but we are a little behind Manitoba in the west owing to so much rain.

Mr. E. Mott has finally turned over his business to Mr. N. White, who has taken possession of the premises and will conduct the auctioneering and second-hand business from now on.

Memorial services in honor of the late General Booth were held in the Orange Hall by the Salvation Army on Sunday last. The Red Deer band kindly assisted in the open air service by playing sacred music.

We offer congratulations to our sister town to the south. The electric light was turned on for the first time in Inisfail on Monday night, and she has now a thoroughly up-to-date lighting system. Mayor West officiated in the opening ceremonies.

Labor Day passed quietly here. Those who were not at Calgary went duck shooting. There was a regular cordon of hunters around Goose Lake and the ducks and mudhens sat quietly in the middle and smiled at the frantic efforts to arouse them.

The number of fairs and skin games at the Red Deer Fair, and the fact the poor citizens were deprived of their money, seems to have worried the Lacombe Globe. "Otherwise," it says, "the fair was rather good." Surely no one in connection with the Globe could have been "touched."

Mr. E. T. Love, Dairy Inspector for the city of Edmonton, was in Red Deer last week. The civic authorities anticipate that there will be a shortage of milk in Edmonton this winter, and that the Laurentia Milk Co. will be drawn on to furnish a large part of the supply. This reason Mr. Love came to Red Deer to see the Company's plant and to investigate the conditions under which the milk is put up, and the financial responsibility of this company.

To the Board of Trade, Mr. Love, who is an expert, expressed himself very much pleased with the methods employed and predicted that there would be a great demand for this product from Edmonton alone. Mr. Love states that owing to the high prices received in dairying has been given a great impetus in the northern part of the province. In one district, east of Strathcona, he states that over twelve dairy barns have been erected within twelve miles during the last six weeks. He thought that this was preeminently a dairy district and said it spoke well for Red Deer's future that it was backed by farmers who are adopting the methods of farming best suited to the country.

N. MURPHY & CO.

THE DAYLIGHT STORE

Lacombe are holding their annual fall fair on September 18th and 19th.

The Callies and Hillhurst are having a very close time of it in the city, looting, loquax, loquax. They played a goalless tie on Saturday.

The following announcement appeared in the Calgary Alberta on Monday: Mr. and Mrs. James A. Peterday, of Dundalk, and formerly of Kincaid, Ont., announce the engagement of their daughter, Alice H., to Mr. Cyril C. Clarke of Red Deer, son of Mr. and Mrs. Charles Clarke, Earl's Court, London, Eng. The marriage will take place quietly the third week in September.

Mr. George H. Jewel, representing the Canadian Order of Foresters, has been in Huntville for the past three weeks, and has succeeded in increasing the membership of the local court by 25. Mr. Jewel has accepted the district superintendency for the Order with headquarters at Red Deer, Alberta, and will be leaving in company with Mrs. Jewel about September 10th. Mr. and Mrs. Jewel were formerly residents of Huntville, and have many friends here who will heartily join in wishing them much success in their western venture—Huntville Foresters.

School opened yesterday with many new teachers and scholars in attendance. Miss Goudie takes Miss Summerby's public school leaving class. Miss Wilson is now this side of the river, and Miss Hill or Miss Close will teach North Red Deer school. Miss Ebert and Miss Bellis are added to the public school staff, and Miss McLean also when she arrives. Miss Tyner and Miss Sproule have the infant classes. In the High School Mr. Gibson is not yet back, but Miss Summerby will take his place until he arrives. There will probably be a new High School building added at Christmas. Principal McKenzie says new scholars are expected from different parts of the province to attend the High School here. Many of the old scholars are back, but others of them are intending to teach, go to university, or take up other business. The new school with its southern part of town will not be opened for a short time yet.

Building Permits

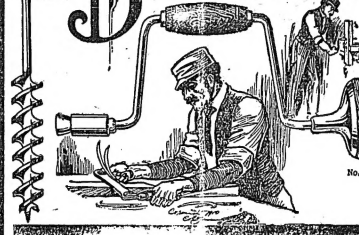

Building permits for August amounted to \$55,315 as against \$16,775 for August of last year, being an increase of over 229 per cent. The total building permits of 1912 up to the end of August amounted to \$282,180, against \$195,670 last year, an increase of over 45 per cent. This will be largely increased, as there are some big ereases as there are some big buildings in sight, such as Michener's block, the Merchants Bank and other blocks.

Great Crowds At Calgary Stampede

Easily the largest crowds in the at Calgary this week to witness the history of the province are gathering Stampede performance. It is estimated that 150,000 people will visit the city during the week. On Monday there were nearly 30,000 present. They began coming early last week from all parts of the continent and have been coming ever since. There are rough riders and cowboys from thousands of miles away, and people have even come from the Old Country to witness the events.

Special trains run from Red Deer every morning this week and return in the evening. Many Red Deer citizens have visited the Stampede, and report having a good time, though it is a little tiresome not to be able to get a seat or a bed for 24 or 36 hours.

BITS and AUGERS DRAW KNIVES

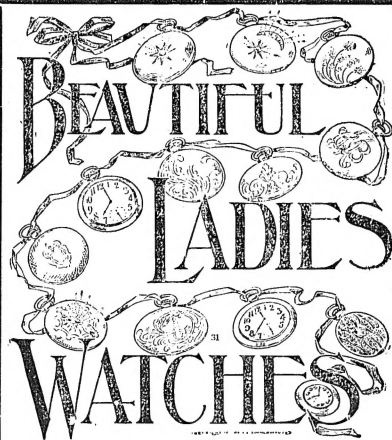

NOBODY can do good work with poor tools. A poor mechanic can do better work with good tools than a good workman can do with poor tools. So as much or more depends on the tools as on the man; besides good tools save time.

Realizing this as we do, all of our goods of this kind are of the best standard makes and fully guaranteed. You can pay less of course, but you get cheapness and not satisfaction, good work or much of anything else.

We have a complete stock of Augers and bits, and plain 8 and 10 inch Braces, as well as Ratchets and Ball Bearing Braces.

The Day Hardware Co.

WE STAND FOR PROGRESS

Notice the Watch carried by the next well dressed woman you meet. If it is smart and fashionable she bought it here—where we specialize in women's beautiful watches—the kind that are moderate in price as well as good.

Come in and let us show you today.
